

New Taipei City International Jewelry Metalworking Competition 2022

Taiwan is one of the world's most important places to consume fine jewelry. It has diversified design capabilities but not the integration of jewelry metalworking techniques. Due to the high quality and stability of Taiwan's talents and adequate technology, the quantitative and qualitative production in Taiwan of the jewelry metalwork will be in the leading position of Asia and even the world, becoming the world's factory for metalwork design and molding in the future.

With continuous advancement and breakthroughs of traditional metalwork, the craftsmanship of fine jewelry can be passed to the new generation to pass on. In this regard, the Education Department of New Taipei City Government and Dong Long Ju (DLJ) Co. Ltd. have jointly planned the competition focusing on jewelry metalwork. We hope that the contestants will use metalwork as the base to express their creativity and combine metal crafts with local culture.

Design theme: Like a Butterfly Fluttering

When the flowers bloom, the butterflies will come. Taiwan is known as the "Kingdom of Butterflies" and has recorded over 400 species of butterflies. This is primarily due to the geographical and topographical peculiarities of the island. Taiwan is located on the Tropic of Cancer line, with a subtropical climate in the north and a tropical climate in the south.

When worn on the body, those butterfly jewelry designs are like dancing butterflies gracefully flying around. Beautiful, elegant, and touching, let us explore the beauty of butterflies together!

We hope that applicants will take the theme "Like a Butterfly Fluttering" as the connotation, make appropriate use of the characteristics of gemstones, and create unique jewelry pieces which are comfortable and refined to wear with a human-oriented approach.

VII. Work Format and Specification

i. Hand-drawing /3D Drawing Category:

1. The competition is divided into three groups: "Junior High School," "High School and Vocational School," and "University and College."
2. Each participant could submit at most one draft, and the design must be drawn on A4 size paper as specified by the organizer, within a 10*10cm box (Exhibit 2) and mounted on A4 size (210×297mm) black Bristol Board. **The 10*10cm box is not restricted if the artwork is in a chain or an ornament.**
3. **The work must be designed with various types of gemstones as the main design element and must be drawn with three-view or detailed drawings to express the content of the creation. Either hand-drawn or 3D drawings on the computer are acceptable.**
4. **Please fill in the personal information and design concept on the registration form and design description form, not directly on the design work.**
5. Please read the format specification and prevent the design work from being damaged when a contestant sends it by post. Works that do not meet the requirements will not be included in the screening.
6. For the Hand-drawing /3D Drawing Category, **a maximum of 10 participants per school is acceptable. Each school will be asked to collect all registrations and send them at once.** Please kindly invite students to apply.

ii. Fine Craft Category:

1. The competition is divided into: "High School and Vocational School" and "University and College." The practice materials will be different between the two groups.
2. The organizer will provide Sterling Silver 925 plates uniformly.
3. The participants should only use the tools provided by the organizer as the metalworking tools required for the competition.
4. The metalworking work must be made on-site according to the drawing

provided by the organizer and completed within the time limit (8 hours for both High School and Vocational School and University and College groups). If the work is completed earlier than the finish time, participants may report to the supervisors and leave the venue.

7. 3 to 5 participants per school are acceptable. Each school will be asked to collect all registrations and send them at once. Please kindly invite students to apply.

VIII. Evaluation Criteria

- i. Hand-drawing /3D Drawing Category:

The evaluation criteria are 30% for structure, 30% for practicality, and 40% for creativity.

- ii. Fine Craft Category:

- i. The grading criteria for the High School and Vocational School group will be based on "sawing, grinding, forging, welding, stone setting, and polishing."
- ii. The grading criteria for University and College group will be based on "sawing, grinding, forging, welding, stone setting, and polishing."
- iii. The total score (C) of the competition includes "on-site production process and technique (A, 50% of total score)" and "level of completion (B, 50% of total score)", i.e., $C (100\%) = A (50\%) + B (50\%)$.
The judges will rate the on-site production process and technique (A) according to the actual operation of the competition, i.e., $A = E (70\%) + F (30\%)$, as explained below.
 - (1) On-site production process and technique part (A) contains two parts: the first part is the professional technique of operation (E, 70%), including the technique of molding, trimming, forging, welding, stone setting, polishing, etc.
 - (2) The second part is the industrial safety and health (F, 30%) of the on-site production process, which includes whether the safety protection equipment is appropriately worn and used according to the regulations, the neatness of tool categorization and arrangement, and the cleanliness of the worktable after the competition.
- iv. The "level of completion (B, 50% of the total grade)" is supplemented with the following explanation.

- (1) The level of completion of the work accounts for 50% of the total score, including completion (30% of the total score) and aesthetic quality (20% of the total grade). In other words, the level of completion (B, 50% of the total grade) = 30% completion + 20% aesthetic quality
- (2) Basically, the work must be completed in time. If the work is not completed and the inlay is not ready, the maximum score will be 15 points in the 30% completion part.

IX. Judging Committee: The judging committee will be composed of professionals from academia and the jewelry industry invited by the organizer and the implementer.
